

HAWA SLIDING SYSTEMS

HAWA FOLDING CONCEPTA 25

- Maximum door weight: 25 kg.
- Door width: 300–700 mm.
- Door height: 1250–2600 mm.
- Door thickness: 19–28 mm.
- Door is automatically pulled into pocket.
- Free access to the entire cabinet front when doors are opened.
- Room-high designs without a cabinet base allow for recess enclosures and walk-in cabinets with uninterrupted flooring.
- Adjustments are made from the front.
- This product is suitable wherever variable use of space and unobstructed access must leave an impression of order, for example for a private office in a bedroom, kitchen appliances, or bathroom.
- Unique scissor technology accommodates large and heavy doors.
- The connector profile makes it easier to assemble cabinet designs with doors striking against the top and bottom cabinet sections.
- Certified LGA.
